

CREASING MACHINE KSL 435

The creasing machine KSL 435 is used for finish of the graphic materials up to the format A3 for max weight of the paper 400 g.m^{-2} . The creasing machine can process the paper with a special surface finish for example reversible laminated in foil. The machine is equipped by upper and lower creasing bars. The lower bar is possible to turn and so change the wide of the crease to 1,2 mm or to 1,8 mm in accordance to the weight of the paper. The longitudinal ruler guarantee the exact position of the crease. The adjustment of the ruler is possible to pursue by the millimetre scale and the adjustment position is secured by two arresting screws. Accessory allows you to make creasing under the angle 45° . The creasing machine KSL 435 makes bending possible for example wedding cards, invitations cards, menu, annual reports, publicity materials, and so on. Machine advantage is practical design, modest service and precision with this machine works.

Technical data:

Working width

450 mm

Max. weight of paper

400 g/m^2

Width of the crease

0,8/ 1,0/ 1,5/ 1,8 mm

Dimensions

50,5 x 50,5 x 9,5 cm

Packing Size

63 x 63 x 19 cm

Machine weight

net 13,5 kg, gross 16 kg
